How to replace ink cartridge on canon mg2525

By Harvey Spector Though replacing ink cartridges on a Canon printer is not a difficult procedure, it does need to be done properly to avoid running into problems or damaging your printer. What You'll NeedPurchase new ink cartridges from an office supply store or online retailer after identifying the type of ink cartridge you need. Check your owner's manual to identify which types of ink cartridges your device uses or search online for compatible cartridges for your particular printer. In addition to working with cartridges made by Canon, most printers work with cartridges made by third-party manufacturers.Removing the Old CartridgeStart by putting a cloth or paper down in front of the printer to catch any ink that spills. With the printer on, open the front panel of the printer. If you attempt to complete this process with the printer off, you may damage the printer by attempting to manually move the cartridge. The front panel should lift up easily and hold in place. After a few seconds, the ink cartridge slides over, making it accessible. When it stops moving, you will see a small lever that you can lift to release the cartridges. The lever is located just to the left or the right of the actual ink cartridge. With the lever lifted, firmly grab the old cartridge and slide it out of its holder. Old inkjet cartridges can be reused or recycled. If you wish to do either of these, set the cartridge aside for later. Installing the New CartridgeRemove the new cartridge from its packaging. Look on the bottom of the cartridge for a small plastic cap or piece of tape against the cartridge, and carefully remove it. Slide the cartridge into the printer with the label facing out. It should slide easily into place. Next, push the lever back down to lock it into place and close the cover of the printer.Testing the New CartridgeDepending on the model of the printer, it will either begin a self-test on its own or it will prompt you to test it on your computer. This test typically only takes minutes, and the device may or may not attempt to print a trial sheet. When this is complete, you can use your printer as usual. Changing ink cartridges is a routine part of printer maintenance, and you may find that you need to do so frequently if the Canon printer in your office sees regular use. Your Canon printer has an access door on the top or front of the unit, allowing you to remove or check the status of the installed ink cartridges. Open your printer's access door when print quality declines due to faded or missing colors, and replace the empty ink cartridge to return the printer's output to its normal quality. Locate and open the access door for your Canon printer. In most cases, you can access the printer's ink cartridges by placing your hand under the top panel of the printer and lifting up. If your printer has a built-in scanner, locate and lower the plastic arm on the underside of the scanner bed to lock the panel in place. Some Canon printer models, such as the PIXMA PRO-1, do not have top access doors; in this case, look for access panels on the left and right sides of the paper tray, then pull them forward to open them. Locate the empty cartridge by checking the status lights that become visible after you open the access door. The status light for a cartridge blinks or turns off when the cartridge is empty. Push the tab above or in front of the empty cartridge to release it from its slot. Lift or pull the cartridge out of the Canon printer. Remove the replacement ink cartridge from its box, but do not open the inner wrapping yet. Check the wrapper for instructions directing you to shake the cartridge before opening it. If you need to shake the cartridge, hold it parallel with the floor and shake several times with a gentle side-to-side motion. You must shake ink cartridges for the Canon PIXMA PRO-1 before opening them, but most Canon ink cartridges do not have this requirement. Remove the ink cartridge from its wrapper. Peel away the tape covering the metal contact points and the plastic cap, if present. Push the cartridge into the empty slot so the metal contacts face the inside of the slot and the release tab faces toward you. When installed properly, the cartridge snaps into place and the nearby status light turns on. Close the printer's access door and wait for the printer's indicator light to go solid before attempting to print. © 1996-2014, Amazon.com, Inc. or its affiliates Two flashes - Machine is out of paper or paper does not feed. Three flashes - Paper jam. Four flashes - The cartridge is not installed properly. Five flashes - The cartridge is not installed properly. Seven flashes - The cartridge is not installed in the correct position. Eight flashes - Ink absorber is almost full. Thirteen flashes - The remaining ink level cannot be detected. Fourteen flashes - The cartridge cannot be recognised. Fifteen flashes - The cartridge cannot be recognised. Sixteen flashes - The ink has run out. The Canon MG2525 cannot physically see inside the cartridges to find out how much ink is actually left. Instead, the copper contacts on the outside of the cartridges contain this information. The ink levels start at full. Every time a page is printed or a head cleaning routine run, the printer writes this information to the cartridge. Eventually, the cartridge will state that it is empty. However this may not be the case, and it may be possible to use the remaining ink in the cartridge. If you have refilled your cartridge, or have purchased a remanufactured one, the copper contacts will already hold the information that the cartridge is empty. Clearly they are not, but it is not currently possible to reset the ink level information on the copper contacts of the cartridge. Instead, you simply need to override the empty error message that is being displayed by holding down the "stop / reset" button on the printer for around five seconds. The printer should continue printing, and use any of the remaining ink in the cartridge. If the printer thinks that both cartridges are empty, you will receive a second error message, and you will need to hold the button for another five seconds. If the circuitry on the cartridges is actually damaged, unfortunately, this process will not work. Youtube Video: Override the empty cartridge message. Change Ink Cartridge Youtube Video: Change Ink Cartridge Once you spend the money to purchase a reliable printer and have one you can depend on, it's nice to be able to save a few dollars on the ink it takes. Several places offer an opportunity to buy ink and cartridges at a discount.Popular BrandsHP Officejet Ink Cartridges, Focus Ink Cartridges, Canon and many other ink cartridges are available at a discount. Besides waiting for sales, ink cartridges coupons can also save you money. Using a little energy and keeping your eyes open can result in some big savings whenever you need to purchase ink for your printer, whether it's an inkjet, a laser or other popular model. Do some research before purchasing from a new site or store. Read the reviews and ask others who have used their products about their experiences.Shopping OnlineAmazon is one place online that carries several brands of ink cartridges. Amazon has HP compatible ink cartridges and Canon computer ink cartridges, as well as other popular brands. Ink cartridges are one of those products that are most often purchased without the option of being able to return them once you pay for them. Because of this, make very sure you are getting the right product for your printer and inquire or read about any warranty information. Some stores and sites will take returns as long as the package with the cartridges are unopened.Shopping at Outlet StoresBuying in bulk can mean a big money savings, and some of the bigger office supply stores and warehouse discount stores sell the cartridges in packs of multiples of three, five or more that break out into a savings off each cartridge. Depending on how much you use your printer, this may be another option to consider.DiscountsEven though you're looking for a good deal, keep your printer brand in mind when shopping for ink and make sure that you shop with reputable companies that sell products that you're sure will work with the model of the printer that you own.Buyer BewareEven though you're looking for a bargain remember not all deals really save you money if the product is less than what is promised. Unfortunately, it may be a lesson that you have to learn after being burned. A bad purchase once will have you looking elsewhere next time. Once you find a vendor you can trust, look for future sales and coupons or other reward methods from the store, and put all of your resources together to make your wisest purchase on ink.
